RE: **Facility ID: FLR05G468-003**
Young-Rainey STAR Center
County: Pinellas

Dear Permittee:

The Florida Department of Environmental Protection has received and processed your *Notice of Intent to Use Multi-Sector Generic Permit for Stormwater Discharge Associated with Industrial Activity* (NOI) and the accompanying processing fee. This letter acknowledges that:

- your NOI is complete;
- your processing fee is paid-in-full; and
- you are covered under the *Multi-Sector Generic Permit for Stormwater Discharge Associated with Industrial Activity* (MSGP).

Your facility identification number is **FLR05G468-003**. Please include this number on all future correspondence to the Department regarding this permit.

This letter is **not** your permit; however, it does serve as **verification of permit coverage**. A copy the sector-specific permit language is available online at www.dep.state.fl.us/water/stormwater/npdes/industrial5.htm or by contacting the NPDES Stormwater Notices Center. Your facility falls under **Sector F & AC** of the MSGP.

February 15, 2017

Your permit coverage becomes effective **02/18/2017** and will expire **02/17/2022**. To terminate coverage prior to this expiration date, you must file a *National Pollutant Discharge Elimination System (NPDES) Stormwater Notice of Termination*, DEP Form 62-621.300(6). To renew your coverage beyond the expiration date, you must submit a new NOI and processing fee to the Department no later than two days before coverage expires.

Until your permit coverage is terminated, modified, or revoked, you are authorized to discharge stormwater from your facility to surface waters in accordance with the terms and conditions of the MSGP. Three key conditions of the MSGP are:

- implementing your stormwater pollution prevention plan (SWPPP);
- retaining the records required by the permit (including your SWPPP) at your facility; and
- conducting your required monitoring.

Required Monitoring:

Analytical Monitoring

Analytical samples of your stormwater discharge(s) must be collected and analyzed at least once each calendar quarter after a qualifying rain event during the periods of January through March, April through June, July through September, and October through December during years two and four of your permit cycle for the parameters specified in your Sector(s).

Analytical monitoring must be conducted in accordance with the following schedule:

- Year two monitoring period begins January 1, 2018 and ends December 31, 2018
- Year four monitoring period begins January 1, 2020 and ends December 31, 2020

The samples must be analyzed by a laboratory that has been certified by the Department of Health Environmental Laboratory Certification Program (DOH ELCP). At the end of the monitoring year, you must average your quarterly Discharge Monitoring Report (DMR) results and record the quarterly average on an annual DMR form. If there is no stormwater discharged from your facility after a qualifying rain event during a calendar quarter, you must still complete and sign a DMR form for that quarter indicating “No Discharge” by checking the box at the top of the form.

Facility ID: FLR05G468-003

DMR Forms

Quarterly and Annual DMR forms are to be submitted using the Departments Electronic DMR System (EzDMR). This system is available online at: <http://webapps.dep.state.fl.us/DepEzDMR> You must submit all applicable monitoring data through EzDMR by March 31st of the year following your monitoring period. For example, analytical monitoring results for 2014 would be due no later than March 31, 2015. If you have any questions regarding the EzDMR system, please contact EzDMRAdmin@dep.state.fl.us.

If you have any questions concerning this acknowledgment letter, please contact the NPDES Stormwater Notices Center at (866) 336-6312.

Sincerely,

Krishna P Baral
NPDES Stormwater Program
